

RESTARTING CONCURRENT MANAGER FORCEFULLY

1. For help this is the reference link [Stopping Concurrent Manager](#)
2. First Stop the concurrent manager and put all the credentials.
3. Now run the command after stopping the concurrent manager `ps -ef |grep FNDLIBR`
4. Now run the command without id `ps -ef|grep FNDLIBR|awk '{print $2}'|xargs kill -9` it will give output no such processes
5. Now run the command with id `ps -ef|grep FNDLIBR|awk '{print $2}'|xargs kill 65047`
6. Now this `kill -9 `ps -ef|grep FNDLIBR|awk '{print $2}'``
7. And now start the services of concurrent manager
